Training Provider List

The following document contains a list and contact names of **TSSA Approved for Qualifying Experience Time Reduction** training providers, compiled for the convenience of students wishing to receive formal, full time and accredited training in their studies.

The Operating Engineers Regulation 219/01, under the Technical Standards and Safety Act, came into effect on June 27, 2001 and provides the opportunity for TSSA approved training providers to offer **full-time** training courses to Operating Engineers and Plant Operators seeking a reduction in qualifying experience requirements. The criteria for offering TSSA approved for qualifying experience time reduction courses/programs is listed on the Operating Engineers' certification services web homepage at **http://www.tssa.org** under Practical Time Reduction Requirements & Approval Process.

Any training provider is eligible to apply for this status and when approved they will have the designation as **TSSA Approved Training Provider**.

Full-Time Programs

Contact Wayne Fischer at 519.740-7185. **Website for museum – n/a**

Please Note:

- Additional non-TSSA approved colleges, trainers, and tutors providing a variety of levels of Operating/ Power Engineering and Operators' training, can be obtained from the Institute of Power Engineers National website at http://www.nipe.ca/, under the heading **'Education'**.

- Unless the training provider is included in the 'TSSA Approved Training Provider List' above, there is no affiliation to TSSA expressed or implied by any of the training providers listed on the IPE National website. No reduction in practical time training is granted by attending any non-TSSA approved course. The link appears for the convenience of the students only.
